Fisher 1260 X M Scope Manuals

Fisher 1260 X M Scope Manuals

What is the maximum deep length for Fisher M-Scope M-96 because it • 1225-X Automatic Metal Detector Operating Manual F I S H E R R E S E A R C H L A B O R A T O R Y.. pg 5 Searching 7 Pinpointing pg 9 Zero Motion Pinpoint Mode pg 9 Pinpointing in the Motion Search Mode.. Remember, as you increase the shaft length, you also increase the strain on your wrist and arm.

• FALSE SIGNALS between the beeps, or if you sweep at right angles to your original direction, you'll receive a single beep directly over the target (except for the very shallow coin).. • CONTROL FUNCTIONS 1 DISC: This control turns the power on and automatically tunes the 1225-X for instant operation.. This is a perfectly normal response indicating that the powerful discrimination circuitry of the 1225-X is doing the job.. View and Download Fisher 1266-X operating manual online Related Manuals for Fisher 1266-X.

The DISC control has no effect when the PINPOINT button is pushed in • DISCRIMINATION POINTS By adjusting the DISC ("Discrimination") control, you will be able to ignore or ("reject") small pieces of metallic target trash and ground minerals while detecting valuable targets.. • FALSE SIGNALS A "false signal" occurs when something that shouldn't, sounds like a good target.. A sturdy hunting knife with a 5" blade will do the job in most soils A high quality double-edged "survival" knife is an even better (and more expensive) choice since it will be almost impossible to bend or break.

All types of metal are detected at the zero level while the most pieces of trash are rejected at ten.. If you walk too fast you can't overlap your sweeps and you'll miss a lot of ground.. " • DISCRIMINATION POINTS 8 Some objects will cause sharp static or "ticking" when rejected.

This is a "VLF-Motion Discrimination" • SEARCHING 7 Search in a methodical manner sweeping in a tight semicircle.. Fisher engineering jargon meaning that you won't have to listen to a "threshold tone" for maximum sensitivity.. • PINPOINTING PINPOINTING IN MOTION SEARCH MODE Pinpointing in the search mode will take a little practice but you may find that for most targets, it's even quicker than the Zero Motion Pinpointing Mode.. There are almost as many ways to do this as there are Treasure Hunters Whatever works for you is good enough as long as you don't break any laws, damage vegetation, or leave your search area looking like a World War II battlefield.. Large pieces of trash such as beer cans or jar lids may sound like a good target no matter what you do.. Your 1225-X does an excellent job of ignoring junk but it's so sensitive to good targets that it can be fooled by bad targets with similar electrical characteristics.
